Hi, My Name is

Darga Noor Mohammed Ali

And I'm interested in Web Development|

About me

I'm Noor and I'm interested in Web Developme|

Age   : 20

Gender : Male

I was born on 15th Aug,2001.
My native place is Kurnool, Andhra Pradesh. Currently persuing 3rd Year B.E in RNS Institute Of Technology, Bangalore, Karnataka. My interests are Programming, Web developer and meanwhile in free time watching series, movies and sports like cricket, football etc.

Objective and Skills

Objective

Secure a responsible career opportunity to fully utilize my training and skills, it may help to further work towards the personal and professional development and can contribute towards the prosperity of the goal of the organization. Doing the challenging tasks and made it complete so as to make the skills faster and better.

Skills

Languages

- C
- C++
- Python

Data-Bases

- MySQL
- Oracle,POP and Postgre SQL
- SQLite

- Java

- MongoDB (Basics)

Web Technology

- HTML
- CSS
- Java Script
- PHP
- Node JS and Express JS
- Python Flask and Django(Basics)

Tools

- VSC
- Eclipse
- Atom
- Xampp
- MySQL Server

Operating Systems

- Windows
- Linux

Education Details

Bachelor of Engineering(B.E)

R N S Institue Of Technology,Bangalore

Stream: Computer Science & Engineering

CGPA: 9.02(Current)

Intermediate

C V Raman College,Andhra Pradesh

Stream: Maths, Physics and Chemistry

Board: BIEAP

CGPA: 9.8

2019

Secondary School of Education

S T Joseph's English School

Board: CBSE

CGPA: 9.6

2017

Certificates Achieved

- Web Development, Internshala Training

- Cyber Physical System Digital Twin For CNC Tuning (ML Using Python), At AMTDC IIT Madras

- Complete Python Developer in 2022 Zero to Mastery, Udemy

- Interactivity With Java Script authorized by University of Michigan, Coursera

- Using Python to Access Web Data authorized by University of Michigan, Coursera

- Mastering DataStructures and Algorithms in C and C++, Udemy

- Machine Learning using Linear Regression ,FutureSkills Prime NASSCOM

- Python Data Structures authorized by University of Michigan, Coursera

- Business English Networking by the University of Washington, Coursera

Projects & Experience

Library Management System

Open In Github

Library Management System, is a website created for maintaining the information regarding the books, details of loaned books, members etc.

The Languages used in this project are HTML, CSS, BOOTSTRAP, JS, PHP, MYSQL.

Here, only Admin has access to the all the details.After the successfull login ,admin now have access to the information about the number of books in library, who have borrowed and when etc. He can also activate or deactivate the particular member. Now the admin... Read more

PG Life

Open In Github

PG Life is a website which is created for the people searching for rooms /students in help for the searching nearby good PG's.

The Languages used in this project are HTML, CSS, BOOTSTRAP, JS, PHP(Included SQLite), MySQL

There will be a login and signup page for not logged in persons and those who did not logged or create account yet. Once user logged in, the data of the user say name, password will be updated to the database directly. Top Rated ... Read more

Hospital Management System

Open In Github

It is a mini-project done using C programming language.

The main function of the system is to add and store the patient's details safely and securely and can retrieve these details as well, when to modify any data meaningfully. This is based on the database and object-oriented techniques. Used the concept of linked-lists and data structures in C and some basic concepts. It is an ease of the handle and will also reduce the errors which might cause due to the manual.

Experience

Cyber Physical System Digital Twin For CNC Tuning (ML Using Python), At AMTDC IIT Madras -Intern

Open In Github

During this Internship ,I was assigned the work based on the data which has observed on ouput of experiments done. A team of 3 members were created by our mentors and allocated work, out of which me as one the member. The main objective is to predict the surface roughness of the cnc tuning machine.Had work with many python embedded libraries that helped me in the process. During this internship, prepared a machine learning model using sklearn(to plot bar charts), matplotlib, numpy, pandas which can simulate working of reading datasets under any given condition. Then increased our samples by using under/over sampling methods. We came up with a machine learning models called logistic regression,linearSVC and confusion matrix to find out the accuracy.

Exam Management System by TechieAid -Intern

Open In Github

This an Internship conducted by TechieAid. The internship duration is 3-4 months. The Technology taught was ASP Dot Net VSC and MVC. SQLite has been used to connect with database. So with the help of the technologies taught we have build a project name Quiz . The Home page will be a Register and Login Buttons for the user. Once user has registered and logged in, he/she can create Quiz regarding the list names in the oprtion menu. User must enter the Questions of related topic. It's like a group of users where one(say specific) user can create quiz and other users(who are logged in) can take those quizzes. There will be four questions per topic seleted from the list.

Contact me

You can get in touch through my address mentioned down, phone number, email, linkedIn for uploaded certificates, github for my projects or can just send me a message (with in a week will come in touch)

Name
Darga Noor Mohammed Ali

Address
Building 758,Ground Floor,17th Main Street Chinnasandra,RR Nagar,Bangalore

Phone
